Production Description

YF27 four post parking lift is designed of two spaces of up and down as one unit. The bottom car can go in and out directly. When the upper space needs to park a car, the car in the bottom should be driven out.Double purpose, the middle cover plate can be won.Used as a lifting machine, for repair the car.

Products Advantages,

1.The maximum lifting height(running plat length 4080mm-1700mm and running plat length 4700mm-2000mm) The maximum lifting weight is 2700-3200kgs.

2Each column has safety lock,protect function when the steel wire rope was broken.

3.Cylinder direct drive.Hydraulic cylinder is installed under the running plate.

4.Drive unit can be installed on the column front or behind according to customer’ s requirements.

5.Sound & light alarm during lowering the system

6.Road wheel is used to move the car lift.

7. Electric protection for power over load or under voltage.

8. Auto locking system for power cut as safety features.

9.Emergency stop button.

10.Explosion relief valve make sure hydraulic safety.

11.The structure of the equipment is made of laser cutting, after bending have beautiful appearance, easy installation and convenient maintenance.

Protective Device

1.Anti-dropping device: to prevent the platform drop suddenly.

2.Limited switch: Limit the lifting height of platform,protect the equipment perform smoothly.

3.Emergency switch: Any abnormal situation arise,press the emergency switch button to cut off the power supply.
